To Our Friends and Customers

E thank you for the kindly support which you have given us in past years, and bespeak the continuance of your friendship in this and coming seasons.

Please notice particularly that the Federal Quarantine Act, now in effect, prohibits the importation of all Narcissi. Our list of American-grown bulbs of Narcissi is fairly representative of the leading popular sorts, and though somewhat higher in price, may be relied upon to give satisfactory results. As the demand is likely to exceed the supply, early buying is suggested.

Early Ordering. Your coöperation is invited, by placing orders early; this will aid us in preparing for the summer and autumn trade and facilitate delivery at proper time.

Rush Orders may be telegraphed or telephoned at our expense.

Prices on Bulbs, Seeds, Plants, and Supplies are subject to market and tariff changes.

Terms. Prices quoted are net and do not include free transit, except for seeds in packets, ounces, or quarter-pounds, on which we prepay postage or expressage to any point in the United States.

Upon delivery of goods by us to the carrier, ownership passes to the purchaser; when the carrier issues a receipt our responsibility ceases. Claims for damage should be made to the agent at point of delivery.

Non-Warranty. William M. Hunt & Company, Inc., give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

How to Grow Bulbs

Daffodils and Crocuses may be planted in the garden between the first of September and the middle of October; Tulips the latter part of October; and Hyacinths any time from September to December.

When grown in beds, Hyacinth and Tulip bulbs should be planted at a uniform depth. The easiest way to do this is to remove all soil from the bed to the depth required, set the bulbs as far apart as the planting-table indicates, and carefully replace the soil. Many people do not think this is worth while; they prefer to plant with a trowel or dibble. Where this practice is followed, great care should be taken to see that the base of the bulb is pressed firmly into the soil.

After the ground is frozen to a depth of 4 to 5 inches, it is well to put on a cover of straw or leaves. This should be removed rather early in the spring. Tulips and Hyacinths should be taken up each year. Let the foliage mature, either where they have flowered or in another location. After drying, the bulbs should be kept in cool, dry place.

Daffodils may remain in the same place for three to four years at a time. The clumps may then be taken up and divided for replanting.

Crocuses give a delightful effect in early spring, but, like Narcissi, should not be planted where grass is kept clipped. They are extremely desirable in naturalistic plantings, but to obtain good effects it is essential that they be used in large quantities; plan to use several thousand in each 50-foot square of woodland or meadow.

Lilies prefer a light soil with good drainage. This may be secured by placing a quantity of sand below each bulb, or by mixing peat or humus with the soil. The tall varieties should be planted in a location where they receive protection from high winds; all of them are partial to shade.

CULTURE INDOORS.—Paper-White Narcissi and the Chinese Sacred Lilies are the easiest sorts to grow. A bowl of pebbles and water is the "garden." Hyacinths likewise present little difficulty. Place each bulb in a glass so that the base barely touches the water, and leave them in a cool, dark place until the roots develop. They may then be brought into the light, and will produce just as fine flowers as if they were grown in pots or outdoors. Start the bulbs any time between September and January; for succession of bloom bring them into the light at intervals of several weeks.

Fall is a good time to set out Roses, see our list, pages 20 and 21

Many of our customers are frequently puzzled to know proper depth and distance apart at which bulbs should be planted. The accompanying diagram conveys the information very clearly. The chart will bear careful study.

New and Choice Varieties of Dutch Bulbs

DARWIN TULIPS

Among the following will be found the newest varieties of "Yellow Darwins." Up to a few years ago this color had to be provided from the Cottage varieties, in which yellows are plentiful. These new yellows and blends of yellow will be found both valuable and extremely interesting to those who desire the complete color range of this race.

THE MENDEL TULIPS

A New Early-flowering Race of Darwins'

By taking the Darwins and crossing with the old-fashioned early Duc Van Thol Tulip, this new race has been produced, carrying the stem, size, color, and formation of the Darwins, with the early blooming properties of the other parent.

TRIUMPH TULIPS

We are very fortunate in being able to offer some of these to our numerous friends this year, but only in Collection form, as the supply of all the named sorts is variable and not nearly sufficient to sell by hundreds or thousands of a kind.

They have been named Triumph Tulips and are Darwin hybrids, having the stem and stately stature of this parent but the colors are most unusual, both in self shades and delicate blendings. They bloom from two to three weeks earlier than the Darwins.

COLLECTION: 10 Choice Named Varieties (5 of each), 50 bulbs, \$40.

COLLECTION: 5 Choice Named Varieties (5 of each), 25 bulbs, \$22.50.

Border of Darwin Tulips

Early Bulbs for Forcing and House Culture

EARLY ROMAN HYACINTHS

The early Roman Hyacinth, with its graceful spike of fragrant bells, is one of

the earliest of all winter-flowering bulbs.

New-crop bulbs will be ready in September, when they may be planted in pots or pans of a compost containing two-thirds fibrous loam and one-third sand. They may also be placed in the more artistic ornamental bowls now available in any china store, using our prepared Bulb Fibre as a filler, which only needs to be kept continually moist, requires no additional fertilizer, and in which the bulbs thrive and bloom luxuriantly. Bulbs planted in September or October will bloom in December.

PREPARED DUTCH HYACINTHS

These bulbs are only intended for indoor planting and have, both in growing and harvesting, been submitted to a treatment that insures early ripening and leaves them in a condition to respond to intense forcing methods for early bloom. Planted in September, they bloom about the same time as the Roman Hyacinths, or soon after them. We offer miniature sizes only.

CALLA LILIES (Richardia)

POLYANTHUS NARCISSUS

PAPER-WHITE. Of all the bulbs one can plant, none gives such real satisfaction in the home or conservatory as the Paper-White Narcissus. Last year we were obliged to resort to Americangrown bulbs, and we are glad to say they gave excellent results. The most delightful and clean way to grow these is in pebbles and water, using as receptacles the many artistic patterns of bowls. Kept a few weeks in the dark after setting, to develop root action, then brought to a light, airy room, temperature about 60 degrees, the white, fragrant trusses will open in about six to seven weeks.

BULB FIBRE

A natural peat fibre, full of nutritious properties for the growing of flower bulbs indoors. This compost acts as a moisture-retainer, which promotes the growth of roots on the bulbs, at the same time releasing its organic fertilizing elements in soluble form, developing and maintaining a steady and sturdy growth on the bulbs until the flowers have matured. Pk. \$1.75, bus. \$6.50.

FREESIAS

New crop bulbs will be ready in July and if potted at once, ${f c}$ an be bloomed early for Christmas.

Purity, The Peer of White Freesias

Darwin Tulips Are Most Striking when Planted in

Undoubtedly this is the finest class of Tulips; they are increasing in popularity every season. The colors range from lilac to purplish black, including shades of crimson, violet, brown, rose, white, etc. Very effective for planting in shrubbery or in hardy plant borders. There is nothing more suitable for vases. Those marked with * are best for forcing.

Breeder Tulips in Tints and Tones of Royal Loveliness

These are the old Dutch self-colored Tulips which have been neglected for many years, but the present taste for artistic colors has, however, called them into prominence once more. Nature's happiest color combinations of purple and bronze, grey and lilac, brown and orange, are revealed to us in this group. The flowers are mostly large, but of perfect form, and are borne on tall, strong stems. They may be successfuly brought into bloom in the greenhouse by the first week of April.

Special Offer of Breeder Tulips

One doz. each of 5 distinct varieties (60 bulbs), our selection, for \$6, postpaid to any address east of Mississippi River, for cash with order,

with purplish flush through center of petals, green base. \$2 per doz., \$10 per 100.

Hyacinths for Garden and Indoor Flowers

Hyacinth bulbs are very scarce this season. Order early to secure varieties required

Hyacinths may be put to several uses. They may be grown in beds, borders, forced in pots or pans, or grown in water, and are very easy of cultivation. They possess a wonderful perfume, and there are many shades ranging from Pure White, Pale Blue, Lavender, Mauve, Purple, Red, Pink, Blush-White, and Yellow. Suitable alike to the amateur and professional grower.

| F | Each | Doz. | 100 |

Arentine Arendsen. Pure white; extra early.
Correggio. Pure snow-white; large truss.
General Vetter. Creamy white; large spike.
Hein Roozen. Pure white; very fine flower.
L'Innocence. Pure white; the best white for all purposes.
La Grandesse. Pure white; fine bells; good exhibition variety.
Madame Kruger. Pure white; large bells and spike.
Queen of the Whites. Snow-white; very heavy spike.
White Lady. Pure white; very large truss.

Hunt's Bulb Fibre is an excellent medium in which to force hyacinths in pots or pans

Narcissi That Will Flower from March to May

1. Victoria. 2. Lucifer. 3. King Alfred. 4. Emperor. 5. Barrii conspicuus. 6. Madame de Graaf. 7. White Lady

Narcissi, or Daffodils, vie with tulips for popularity in spring gardens. By a careful selection they bloom from March into the middle of May. Many varieties may be forced in greenhouses or grown in pots or dishes in the home; very easy to cultivate.

The Federal Quarantine Act being now in effect, no Narcissus bulbs can be imported from abroad, and the varieties offered this season are therefore American-grown. Due to the better standards of living in the United States, and consequently heavier costs of production, the growers' prices are necessarily somewhat higher than for Dutch bulbs, but we have every assurance of the excellent quality of the Americangrown product. Until this new industry has had time to become thoroughly established, there will be a limited supply, and we therefore recommend our clients to place their orders early, to make sure of securing the varieties they may select.

LARGE TRUMPET (Ajax)

Varieties belonging to the Ajax division have trumpets or crowns as long as or longer than the perianth segments.

Clump of Poetaz Narcissi

Miscellaneous Bulbs for Flowering in the Spring

For some years, because of the plant quarantine, we have not been able to offer several varieties of bulbs which appear in our list this season. They eannot be developed satisfactorily in this country, and, as we were unable to import them, it meant that we had to dispense with them entirely.

This quarantine has now been modified, so we are able to offer once more a wide selection of first quality French and Holland bulbs.

Hardy Garden Lilies for Fall and Spring Planting

Lilium candidum

Hardy Lilies are among the most gorgeous and easily grown subjects for the herbaceous border, and, without crowding other plants, throw up their sturdy stems each year with an eager desire to unfold their wonderful blooms over the heads of nearby eompanions, and hold the admiring gaze of those who pass by. Lilies thrive in partial shade, that is, the lower stem and bulb are better shaded by the foliage of other plants. Their stem roots, which feed almost on the surface of the soil, need plenty of food and moisture. They revel in the "peaty" soil of a rhododendron bed, but thrive equally well in a rich sandy loam. The most beautiful forms are Lilium auratum, L. speciosum, vars. melpomene and rubrum, L. regale, L. tigrinum, and L. Henryi. Plant from 4 to 6 inches deep.

*Ordinary Japanese Lilies arrive in November. When bulbs come to hand too late for fall planting, orders booked are carried over for spring delivery.

*Auratum (The Golden-banded Lily of Japan). One of the stateliest of all the hardy Lilies; grows 3 to 6 feet high and bears twenty or more large and fragrant flowers 8 to 10 inches in diameter. Planted in elumps of six or so, they make an attractive sight. Flowers white, spotted deep red, with bright yellow band running through the center of each petal, in August. offer are the true, hardy, Northern French-grown; arriving here in September, they should be planted at once, in groups of from 3 to 6 dotted among the taller-growing Perennial plants in the Herbaceous border. They make their leaf growth in October, then die down and bloom late the following June—stately spikes of large white, fragrant flowers with yellow anthers. The new Hybrid Delphiniums (Wrexham strain), Campanula Pyramidalis, and tall growing pink Gladiolus, planted in proximity make a border of exquisite charm in June and July. \$5 00 \$40 00 55 00 Batemanniæ. Bcautiful Japanese variety, growing 3 feet high, with six to eight apricoteolored flowers on a stem. Blooms in July and August..... 30 00 Canadense (Canadian Bellflower Lily). Flowers vary in color—red and yellow. Grows 2 to 5 feet high. Flowers in June and July. 2 50 Croceum. 3 to 4 ft. Golden yellow flowers in June and July. Very reliable and hardy. 4 50 18 00 33 00 *Henryi (Yellow Speciosum). 4 to 5 ft. In form and habit resembles L. speciosum. Flowers shaded yellow, slightly varying in color, with a distinct and waxy green center.

Blooms during August and September.... 8 00

| Regale (Myriophyllum). 3 to 4 ft. Of comparatively recent introduction, this variety has come to be regarded as one of the best garden Lilies. White flowers, trumpetshaped, slightly suffused pink, with yellow center; very fragrant. Plant is slender and takes very little room when out of flowers. Will thrive in any good soil if not too wet.\$ | | | \$75 | |
|---|-----|----------------|----------------|----|
| *Speciosum album. 3 to 4 ft. This is a very dainty white Lily. It flowers in the border or amongst the shrubbery at the same time as <i>L. auratum</i> , and is one of the most popular varieties. Used extensively in pots for | | | | |
| greenhouses. Extra-large bulbs Large bulbs | | | 50 35 | |
| *Speciosum Melpomene. Large, dark crimson spotted flower of striking appearance. Pro- fuse flowering. Mammoth bulbs. Extra-large bulbs. Large bulbs. | 8 6 | 00 | 60 45 27 | 00 |
| *Speciosum rubrum. 3 to 4 ft. Bears an abundance of spotted rose flowers. Blooms outdoors Aug. and Sept. Mammoth bulbs Extra-large bulbs Large bulbs | 6 | 00 00 50 | 60 45 27 | 00 |
| Tigrinum splendens (Tiger Lily). 3 to 4 ft. Orange flowers spotted black. Very hardy. | 2 | 50 | 20 | 00 |

These Are Unusual Plants for House or Garden

AMARYLLIS

For growing in the house or conservatory, few plants produce as striking a display, with so little trouble, as Amaryllis. The bulbs should be potted in the fall, be kept rather dry all winter until growth starts in early spring when they should be watered plentifully, fertilized and lightly shaded. A few weeks, and they break into immense lily-like blooms of gorgeous color and form.

Vittata Hybrids. This selection contains a mixture of the finest unnamed seedlings in cultivation. The colorings and markings are unique and provide a show of unexampled beauty. Extra-large, sound bulbs of enormous size. \$1.50 each, \$15 per doz.

SPIRAEA

Extra-Large Clumps

We recommend the following varieties for forcing or outdoor culture. The clumps we offer are very large and cannot fail to give satisfaction.

Culture.—They require a compost of equal parts of loam and leaf-mold and should be potted singly in 6 or 7-inch pots, in October or November. Place in coldframe until required for forcing; water freely when growth begins. Remove to coldframe after flowering and plant out in sunny position in June.

America. Lilac-rose—a beautiful orchid color with large, feathery flower-spikes and beautiful foliage. This variety is one of the very finest and holds its Doz. color well. Medium height. (13 weeks).........\$11 00

Ceres. Delicate lavender-pink. Magnificent plumes, frequently measuring over 1½ feet, and altogether one of the showiest of all Spiræas. The foliage is light green; plant very graceful and tall. (13 weeks)..... 17 00

Iris (Fleur-de-lis) Add Character to Modern Gardens

Holland Iris

Iris Tingitana and Spanish Iris may be grown both in and outdoors. If planted indoors they should not be forced as they will be apt to come blind; given a slow treatment they will bloom without difficulty around March.

Imperator. Early-flowering Holland Iris. Brilliant blue, large and well-shaped flowers on long, strong stems. The best of the Filifolia type for greenhouse culture. \$2 per doz., \$14.50 per 100, \$140 per 1,000.

Tingitana. Early-flowering Dutch Iris. Produces large, well-shaped blue flowers on long, strong stems, and if grown cool in greenhouse may be had into flower early in March. Will not stand forcing. \$1.75 per doz., \$12 per 100, \$110 per 1,000.

Spanish Iris

Alex. von Humboldt. Exquisite light blue. Belle Chinoise. Dark golden yellow. British Queen. Large, pure white. Cajanus. Canary-yellow. Darling. Lovely azure-blue. Emperor of the West. Dark bronze. Excelsior. Light blue, deep orange blotch. Flora. Creamy white, with lavender standards. King of the Blues. Intense blue; fragrant. Louise. Very pale blue and white. Snowball. Pure white. Handsome shaped flower.

All named varieties, \$1.25 per doz., \$9 per 100, \$85 per 1,000 Spanish Iris, Mixed. A fine mixture of the above varieties; suitable for bedding and for cutting. 75 cts. per doz., \$5.50 per 100, \$50 per 1,000.

Radiance

Fall Is a Good Time to Plant Roses

More people, every year, are planting Roses in the autumn when the ground is more easily worked than in the spring, and when new strong plants, fresh from the fields, ean be had. The long winter rest gives the roots opportunity to establish themselves and enables the plants to start off promptly in spring. It is well, when planting in autumn, to hill up the soil about the plants to prevent water from settling around the eollar and to prune them only very slightly.

When spring comes, level the bed on a cloudy day, prune off the dead tops of the cancs which have protruded from the mound, cultivate them regularly and success is easy.

Hybrid Tea or Everblooming Roses

Extra-strong field-grown plants, \$1 each, \$10 per doz.; 3 Roses in one variety for \$2.50, postpaid

Betty. Coppery rose, overspread with golden yellow. Chateau de Clos Vougeot. Dcep, soft, velvety scarlet flowers of the utmost richness and most notable fragrance.

Columbia. Lovely pink buds and blooms which do not fade as they mature.

Duchess of Wellington. Buds are slim and elegant, saffronyellow, and opening to loose and informal flowers.

Francis Scott Key. Very double flowers of immense size and great beauty, lasting in perfection for days. General MacArthur. Well-shaped flowers of bright crimson,

and produced abundantly on strong plants.

George C. Waud. Fragrant globular flowers of bright red. Gruss an Teplitz. Glowing crimson flowers are in clusters on plants that may be grown into a wonderful hedge.

Harry Kirk. Straw-yellow flowers, sweetly perfumed; plant remarkably vigorous and of free-flowering habit.

H. V. Maehin. Very large flowers of scarlet-crimson on sturdy and productive plants.

Miss Cynthia Forde

Mrs. Aaron Ward

Jonkheer J. L. Mock. Silvery and dark pink buds and flowers. The plants are vigorous.

Killarney Queen. Remarkable for its long, deep pink buds, opening into broad blooms of informal beauty.

Lady Alice Stanley. Very large, fragrant blooms of flesh and coral-pink, profusely borne on very vigorous plants.

Lady Ashtown. Bright pink, shading to golden yellow at the base of the petals. Well-formed.

Los Angeles. Flame-pink, apricot, salmon, gold flowers of notable fragrance; buds exquisite.

Miss Cynthia Forde. Large pink flowers with peculiar pointed and edged petals; fragrant and fine. Mme. Butterfly. Pale pink, suffused apricot and gold, of

good texture and fragrance. Mme. Caroline Testout. Round satin pink flower, shaded darker at the center and lighter at the edges; vigorous.

Mme. Edouard Herriot. Coral-rcd buds develop into flowers of the same hue, shaded yellow to pink.

Mme. Jules Bouche. Lovely white buds tinted pink at times. Plant good and blooms well.

Mme. Leon Pain. Unusually large and full pale orange-salmon. Vigorous and a good fall bloomer.

Mrs. Aaron Ward. Soft yellow buds, coming in profusion. Mrs. Ambrose Ricardo. Large blooms of deep yellow overlaid with a lighter color and suffused pink.

Mrs. Wakefield Christie-Miller. Great peony-like, open flowers of delightful clear rose and blush tints.

Ophelia. Pale flesh-pink flowers with buds of peculiar elegance. Does well in the garden. Premier. Dark pink flowers of pleasing fragrance, borne on

stiff stems. Radiance. Light rose-pink flowers, with beautiful suffusions of decper color. Produces an abundance of flowers.

Red Radiance. Even better than the parent Radiance in habit, and light red, great globular flowers.

Gruss an Teplitz

Duchess of Wellington

Hybrid Perpetual, Climbing and Rambler Roses

Hybrid Perpetual or June Roses

These Roses give an abundance of bloom in June and grow much taller than the Everblooming Roses; for this reason they are best used for individual bushes, among shrubbery, or along fences.

Extra-strong, field-grown plants, \$1 each, \$9 per doz.

Captain Christie. Plump and heavy buds with backwardcurling petals of pale silvery pink.

Frau Karl Druschki. Pure, snow-white blooms of immense size are produced in great abundance. A beautifully shaped Rose that has many admirers.

Georg Arends. Well-shaped, delicate pink buds of pure, even color, opening into large and very beautiful flowers. One of the most popular Hybrid Perpetuals.

Magna Charta. Large flowers of rosy carmine, carrying heavy fragrance, and freely produced on vigorous plants.

Mrs. John Laing. Immense blooms of soft, clear pink; fragrant. Deservedly popular.

Ulrich Brunner. Large flowers of light, clear red, tending toward purple of a shade peculiarly its own.

Collection: 5 Hybrid Perpetual Roses in 5 varieties, our selection, \$4, postpaid

Grass Seed Mixtures from the Finest Recleaned

HUNT'S PERFECTION LAWN SEED

This mixture is well worthy the name we have bestowed upon it, and we firmly believe is destined to become the favorite Grass Seed for use where a fine lawn is of importance. It is the result of careful study and trials made during the past few years under varied conditions. Those who have tried out this seed tell us that "we have got the real goods for a perfect lawn." Lb. 80 cts., 20 lbs. \$12.50, 100 lbs. \$60.

Hunt's Perfection Lawn Seed contains 10 per cent South German Mixed Bent (Creeping Bent).

PROSPECT PARK LAWN SEED

With proper care of the soil before sowing it will produce a rich, velvety lawn in six to eight weeks, which will remain green throughout the year. For making new lawns we recommend 5 bushels to the acre; 1 pound of seed will sow 250 square feet; for renovating use one-half this quantity. Lb. 55 cts., 20 lbs. \$9.50, 100 lbs. \$46, 1,000 lbs. \$450.

Hunt's Lawn Dressing Seed

Unsurpassed for Restoring Old Lawns

Our Lawn Dressing Seed is a scientific blending of the Finest Lawn Seeds with those fertilizing elements that give nourishment to the rootlets, thus insuring perfect growth, fine texture, and deep, rich coloring. Germination and rapid growth are stimulated by its free use.

Seeds Are Used on Private and Public Grounds

HOW TO MAKE A LAWN

To produce a good lawn requires considerable work; do not make the mistake of trying to cheapen the preparation, for nowhere in the garden is the old axiom of "what is worth doing, is worth doing well," better illustrated.

The soil must be deep; a good lawn cannot exist on thin soil. Plow the ground deep—a foot is none too much. Apply to the soil before plowing, a heavy coating of well-rotted stable manure. Fresh manure carries too many weed seeds; its use should be avoided. A lawn will not thrive on sour soil; lime the ground after plowing, using 2 tons of ground limestone to the acre. If manure is not available, sheep manure or chemical manures may be substituted.

Ground bone-meal, 1½ tons to the acre, is a good lawn fertilizer, furnishing plant-food over a long period; 100 pounds of nitrate of soda and 100 pounds of dried blood to the acre should be applied at the same time; these furnish nitrogen for immediate use. Sheep manure at the rate of 1,000 pounds to the acre may be used instead of nitrate of soda and dried blood. When only a small lawn is being made, use 20 pounds of bone-meal to 250 square feet, ½pound each of nitrate of soda and dried blood, or 6 pounds of sheep manure. Harrow and cross-harrow until the ground is thoroughly pulverized; the better harrowed the ground is, the better the grass will grow and the more permanent the lawn.

Sow Hunt's Perfection Lawn Grass Seed, a mixture of the finest American and European grasses adapted to lawn uses; it will produce the rich velvety effect so much desired. An acre requires 5 bushels of seed or one pound to each 250 square feet. Harrow or rake the ground lightly, and roll with a heavy roller.
